**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/594,950	<b>Applicant(s)</b> GOLD ET AL.	
	<b>Examiner</b> Peter R. Brown	<b>Art Unit</b> 3636	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 05 July 2009.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claims 4,8-13, and 19-28 have withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected a non-elected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 5, 2009.

While the search for the species may overlap to some extent, certain features and details within each species would require additional consideration and search, and would provide additional burden on the examiner.

Claims 1-3,5-7,14-18 and 29, as selected by the applicant, will be addressed for prosecution.

Claim 29 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 29 is in improper form.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5,6,14-18 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Galbreath.

Figures 1-13 show structure as claimed including an elongated body 10 for securing a child seat to a vehicle anchoring point, having a first connector 18-20 at

one end and a second connector 27 at the other end. Note that the edges of the openings form “guide elements”, and one of the connectors utilizes an automatic latching means with an actuator 21.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Galbreath in view of Baloga et al ('649).

The use of a cross member between anchoring connectors for a child seat is shown to be conventional and well known in the art by Baloga et al (figs. 4,5), and in view of this suggestion, to have provided such for the connectors of Galbreath, for the purposes of creating a single unit and also allowing width adjustability therebetween, would have been an obvious modification to one with ordinary skill in the art. Regarding claim 7, to have formed both connectors as conforming to the ISOfix standard, thereby allowing child seats with such connectors to be utilized with the connector means of Galbreath, would have been well within the level of skill in the art, thereby providing easier access for anchoring the child seat to the vehicle.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Barley, Jackson, Batalaris et al, Baloga et al ('957), Anthony et al, Boyle, and Woodard et al show various features of the invention.
